Cryo Hops® Brand pellets are produced from whole leaf hops using a proprietary, patented cryogenic separation process that preserves all components of each fraction. Liquid nitrogen is introduced at the start of the **Cryo Hops®** process, creating extremely low temperatures, minimal oxygen, and a nitrogen-rich environment. This results in a higher concentration of lupulin when compared to other concentrated pellets, reducing the volume required, while improving beer yields by minimising trub in the kettle.

DynaBoost™ was created as a hassle-free whirlpool addition that amplifies aromatics through a concentration of wort-soluble compounds. Thanks to that solubility, you get less solid matter impacting your waste stream and more wort heading to your fermenter, with some brewers reporting up to a 5% increase in wort yield.

**Centennial · Citra® · Ekuanot® · Idaho 7®
Mosaic® · Sabro® · Simcoe®**

HyperBoost™ is a concentrated hop oil (40-70%) for whirlpool, fermentation and dry-hop additions. Intended to amplify hop aromatics and increase yield, **HyperBoost™** excels at adding beautiful hop aroma anywhere pellets are normally used, including cold-side applications. **HyperBoost™** is made from single-hop varieties to deliver variety-specific aroma boosts to your finished beer.
